	3	3	6	9

Time Management						
#	Risk	Hazard	Likelihood	Severity	Overall	Solution
1.1	Not Starting Project on Time.	Less time is spent on project and work becomes rushed.	2	2	6	Start project on time
Injury / Problems						
2.1	Back / shoulder pain, eye strain, headaches, sprains / strains, etc	I become unable or less able to complete the project.	1	3	3	Take breaks & use tools to alleviate these problems: Good posture, night light, low brightness, etc.
2.2	Poor sleep schedule	Fatigue while working on project.	2	2	4	Do not work on project or view blue light soon before sleeping.
GitHub						
3.1	Project is incorrectly / not branched	Repository does not fulfil specification	3	1	3	Pushes and branches will be tested on a dummy repo before done on real repo.
Other						
4.1	Not understanding a concept.	Work may be done incorrectly and affect the project.	2	2	4	Research can be done to learn these new concepts, or the trainer can be asked questions.
